AutoCAD offers many benefits for architects, engineers, drafters, and construction managers. Features include 3D modeling, 2D drawing creation, 3D plotting, parametric modeling, virtual construction, 2D drafting, 2D and 3D animation, plot-based workflows, Web-based collaboration, and many others. With AutoCAD, the user can work in either 2D or 3D. The software contains tools that allow the user to create, modify, and view 2D and 3D objects and drawings in all the following major application areas: Architecture, landscape architecture, interior design Engineering, construction, manufacturing, interior and exterior design Landscape engineering Planning, architecture, interior design, construction Drafting Contour and profile drawing Two-dimensional drafting and plotting Creation, modification, and viewing of parametric solid modeling objects Topological editing Design of engineered components Construction of 3D models of concrete, metal, and wood Building modeling Planning, design, engineering, construction Adobe CADDocs: CADDocs are the best web applications for CADD. In the past, it was very difficult to develop a web application for Autodesk products. To make things worse, Autodesk only provided API key for certain products. Now that CADDocs now has it, you can easily do CADDocs in Autodesk products using Adobe CADDocs. The best part is that CADDocs does not need to be installed on the users' computers. It is a web application that works from any browser. You don't even need Adobe Flash. Features: Autodesk DWG, DWF, DWFx, DFX, DGN, and many other file formats for 2D and 3D modeling, plot, and presentation Design creation AutoCAD-like feature navigation Geometric object creation Object style editing Refinement of existing models Drawing creation Pattern creation Plot creation Presentation creation Database support API integration Integration with other Adobe products Integration with other Autodesk products Useful utilities Autodesk CADDocs are web applications that provide a consistent workflow that complements Autodesk products.
