KEYMACRO is a small software instrument that allows you to control your favorite MIDI synthesizer (or other MIDI-enabled program) with a keyboard. The main features include: Support for multiple instrument, preset, and track views Note on/off Change volume Quickly transpose notes Quickly set octave Reconnect or disconnect MIDI tracks to/from MIDI devices Supports up to 16 independent presets and 8 instrument views

Pokie Poker is a fun and simple card game that allows you to play a live poker against the computer or you can play head to head against another Pokie Poker player. How to play: Choose one of two styles: "Single-player" and "Multi-player". In the "Single-player" version, your opponent is the computer. The computer will select up to three of the 25 different playing cards. In the "Multi-player" version, you and another player will both be playing the computer at the same time. The new Pokie Poker game is a completely original machine in the world of pokies. A first for Pokies, all the graphics and sound have been designed from scratch. You will experience an impressive and fresh atmosphere. Everything will depend

---

on your skill of the game. Don't get stuck by the lack of strategy and ability to take advantage of situations. If you play more than 5 minutes you will win. You will win if your opponent does not cheat, as that is part of the game. When you get rid of the opponent you will win. You can also win when your opponent get caught cheating. Double Chance is a fun and very exciting slot machine. You will need lots of practice to beat the game. The computer does not cheat in this game, and it is best to keep your bet low, and you will also need to play very fast to win. What's New in this Release: Added a visual info for each bet. Fixed a bug in some graphic representation. `dobaka[box]` is a universal audio/MIDI sequencer and player. It can play MIDI files as well as audio files in any format supported by `jackd` or `gtkmm`. `dobaka` features: \* support for audio/midi files recorded directly in `jackd` (for example, from your internal audio card, usb or networked device) \* support for `77a5ca646e`

---

## SampleCalc [Mac/Win]

Edit song information, e.g. change the tempo, length, note length, and/or remove some notes. You can also use DrumBlock DrumRepeater and DrumGrid to organize and play drums. You can organize drums using standard drum notation, set a number of repeating patterns, choose a number of loops, or start each drum with a new pattern (which is especially useful if your playing style needs several patterns played simultaneously). You can also play drums using MIDI keys or samples from DrumLoop. Some other useful tools in DrumBlock: A drum synth is used to play drums in MIDI format. You can combine the output of the synth with an organ, or use other synths. The Pitchbender is a drum machine for playing musical notes. Its sound is always the same, which gives it a unique and pleasant sound. You can use the synth as a drum synth, but in this mode you have a frequency control that can be used to modify the drums according to your own needs. In a classic drum pattern

---

mode the frequency control is disabled. If you are playing in a keymapped mode with a chord, you can use the first position of the keyboard as the frequency control. The Additive Synthesizer is another synth that provides various sounds. You can use it as a monophonic synth, a drum synth, or to build chords. The note names are displayed on the screen. Chords can be modified easily. You can download the Additive Synthesizer source code from the samples section The MIDI clock and volume are controlled using the MetaControl. You can use the MetaControl to control external MIDI equipment. CueStar is a great tool for recording and editing cue files. Your cue files can be exported as WAV files, or into the MIDI format. The file name of the exported file can be adjusted. The export includes the length of the cue file, and whether the duration of the CueFile is even or odd. CueStar is especially useful when you are cutting songs or cue files, and you need to be able to control the length of the file. The MusicBox is a synthesizer to play melodies, harmonies, and chords. It has two oscillators that can be tuned to any note in the

---

keyboard. The notes can be tuned to any pitch and the frequencies can be independently modulated by any of the 16 note positions. Check the list of the most important features below: The

### **What's New In SampleCalc?**

SampleCalc is a tool that calculates a given length in seconds of an audio sample into tempo in BPM and reverse. You can also adjust Number of measures and beat resolution Also included a calculator for time/tempo stretch rate calculation if you want to adjust tempo or time to a fixed value (e.g. matching to the tempo of a sequencer song). Length can be read directly from wave files. The duration of a song can also be calculated from tempo and number of measures as well as length of single notes. This may help you to set delay (or other time dependend) settings. Additionally the frequency of note lengths is calculated (e.g. for oscillator adjustment) An integrated beat counter allows DJs to measure the tempo of a running song. A metronome can be run according to

---

counted tempo. Metronome tempo can be changed. Chords/Arpeggios also play while changing notes, with a view to making the music more attractive. The Sounds you can choose from are organized in a tree. List of sounds A piano like sound for quarter notes. Diatonic bass sound Electric bass sound Fret-tonic bass sound Percussion sound for 6teenths Pick sound for a whole Plucked string sound String sound Ride/Dry plucked note sound Tubular sound Electronic Organ sound Bass Like sound Cello like sound Clarinet like sound Congas like sound Euphonium like sound Flute like sound Folk like sound Guitar like sound Guitar string sound Horn like sound Mandolin like sound Oboe like sound Saxophone like sound Sitar like sound Trombone like sound Violin like sound Wind like sound Chords/Arpeggios also play while changing notes, with a view to making the music more attractive. The Sounds you can choose from are organized in a tree. List of sounds A piano like sound for quarter notes. Diatonic bass sound Electric bass sound Fret-tonic bass sound Percussion sound for 6teenths Pick sound for a whole Plucked string sound String sound
