It is a simple Java program. Q: Catching all exceptions? I'm making a program where the user is able to type code and I was wondering if there's a way to catch all of the exceptions in the code. If there is, I'd appreciate if someone could tell me how to do it. A: Basically, whenever an exception occurs, the JVM checks whether it is handled. You need to call exception.printStackTrace() to make sure you have caught all of the exceptions. The following StackOverflow post is a good summary of exception handling: Feedback Search Can we contact you directly by phone? Q: How to prove $y=mx+b$ can not have a general solution? I am interested in the following question. Let $y=mx+b$, where $m,b,a\in \Bbb R$, and $a eq 0$. I want to prove it can not have a general solution. I am stuck in the case $m=0$ because the two equations become equivalent. Also, my question is actually the reverse of mine, but I think the way I was phrasing it might have made it look more challenging. Let $y=mx+b$ where $m,b,a\in \Bbb R$, and $a eq 0$. I want to prove it can not have a general solution. Is there some specific way to approach this? A: If $m e 0$, then $y=mx+b\iff y=\frac{y-b}{m}\iff b=\frac{b}{m}+\frac{y}{m}-y\iff y=b+\frac{y}{m}$. Hence, the equation $y=mx+b$ has a unique solution which can be
