Could you could provide a test case to reproduce the issue as well as share your desired outcome? There are a few tickets open against "vacation_ok" that seem to still be open so perhaps these can be coordinated?Q: Given date difference in HHMM format i want to calculate the difference between the two given date.My problem is i've the difference in HHMM format (like "07:30:00"). How can i convert it to date? I'm using Java 8 and JDK 1.8. I've made a string-to-date-converter but that's way to long solution to a problem of a few characters, and also I'm not sure about the accuracy of my algorithm.

I really wasn't happy with how this turned out, and since I had had so much fun with this one, I was determined to fix it. I really wouldn't recommend it. The lights of the city came to life, the colors were bright, and the music sounded glorious. As the sun shone down upon Miami and the city reveled, it seemed as if the next step was inevitable, and that Miami would begin a new era of prosperity, creativity, and determination to excel in arts and culture. The city seemed like it was at the center of a blessing, a blessing so big that you felt you could feel its energy ripple throughout the country and the world. And then the city erupted. Fountains of chaos poured down the streets of Miami. There were cars. There were cabs. There were school buses. There were police cars. Then there were the blockades. Most importantly, there was an electricity felt throughout the city that played out with a grace that brought a sense of sorrow. As the people around me turned into a human gridlock, I began to feel the sorrow. I began to feel the pain that was being felt by the people of our city. And I began to feel the anger that would fester within Miami. And then the darkness descended. City officials, including Gov. Rick Scott and Mayor Tomás Regalado, were forced to enter the fray. Regalado, in particular, seemed to be on the defensive as he echoed the rhetoric of the violent protesters, put the blame on local and federal government, and reminded us all that if the violence goes unpunished, it's a slippery slope towards anarchy and revolution. As he walked onto the scene, he seemed to be pleading for the protesters to stop. As he pleaded for the protesters to stop, d0c515b9f4

By default, sql server will pick up the database from the default location(run from application), but while accessing the database from management studio it shows the database that is stored in the directory. How to make sql server to always use default database for storing the other databases? A: If you are using SQL Server Management Studio you can connect to the default database(where all databases will be stored) and it will give you the option to connect to other database's. If you are running the application which doesn't provide the choice then you need to use the following query to connect to the default database. SELECT SERVERPROPERTY('EngineEdition'), SERVERPROPERTY('EngineEdition') = '11' OR SERVERPROPERTY('EngineEdition') = '12'
