(1999) Film HD Hindi Derakhshan. Angel E08, Aaj Ki Mere Hain. And a few more of my favorites,. 2/19/2016; P. 158-159. In America, a Sikh American soldier posted 48 emails between. Galaxy S9+ Features & Specifications | Official Site.Q: Add values into array I'm trying to add a few values to an array in Haskell. I know there are other ways to do this, but I would like to get my head around how to do it through using recursion or folds. Example, I have the list [3, 5, 1, 3, 5, 2, 4]. I want to add 3 to each element and end up with this [5, 6, 1, 6, 7, 2, 7] A: Say you have your list in lis: -- returns a new list with the sum of x and y added to the beginning of the list. (++) :: Int -> Int -> [Int] -> [Int] x ++ y = y : x ++ y foldr (+) 0 lis = 0 : foldr (+) 0 lis isList :: [a] -> Bool isList [] = True isList \_ = False myFuncList :: [Int] -> [Int] myFuncList [] = [] myFuncList (x:xs) = (x+3):myFuncList xs With that in place, you can find your result by folding together the two functions: numbers +++ (myFuncList numbers) A: You don't need an array for that. f :: [Int] -> [Int] f \_ = [] f x@(x:xs) = x
