How to force the computer to allocate more ram? The answers given looks better to me than the question. Are we supposed to delete the question and redirect the votes to the one with more number of votes? I am not sure of the policy towards such cases, maybe this question has been asked before. I couldn't find one but maybe I missed one. A: The policy is: don't do it. We want questions to stay for the whole community to benefit from them, and simply redirecting those who want to answer the original question to the better solution is a misuse of this site. Sonographically guided arterial catheterization as an aid to diagnosis of intracranial aneurysms. Sonography has the potential to be a useful method for the diagnosis of intracranial aneurysms. The authors have developed a technique of sonographically guided arterial catheterization of the circle of Willis that can be performed using commercially available equipment. A method of sonographically guided placement of a catheter is described that involves using a needle to traverse the external carotid artery to a parenchymal vessel to a branch of the internal carotid artery. The catheter is then advanced from the external carotid artery to the parenchymal vessel to the internal carotid artery. At the beginning of the procedure, the catheter is cut at approximately 1 cm from its tip. Next, the catheter is advanced 4 cm distal to the tip, and the needle is removed. The tip of the catheter is fixed in place by gently pressing the catheter against the skull. During sonographic guidance, the parenchymal vessel is compressively pressed, the signal is observed, and the catheter is advanced farther. The catheter is then fixed in place,
