March 31, 2021 - Sim Gives Baby Up for Adoption ---- For Babies, Toddlers and Kids. Ask a partner if there is... It is compatible with all mods under the sun. Do you have a loved one, he suits you, but you want your child to be from him? In such a case, use this mod to ensure that the child is compatible with your partner. Now that your child has been born and the parents know each other, you can apply for permission to adopt. If your child was born first, then both parties must approve this application for adoption. If the child is the second born, then approval must be obtained from only one parent.
